- Touch-Free, Hygienic Water Dispenser
- Sustainable Water Source Away-From-Home
- Filter Replacement Indicator Light
- Fast Fill Up
- Durable-Gauge Stainless Steel
- Use of antimicrobial additives in key components to protect them against the growth of mold and mildew
- May Qualify For LEED Status/Points

ADDITIONAL FEATURES

NSF/ANSI 42 & 53 CERTIFIED FILTRATION

In addition to being certified to NSF/ANSI 42, drinking water – aesthetic effects, the Brita® Hydration Station™ is the only public NSF/ANSI 53 certified drinking water system on the market. NSF/ANSI 53 addresses point-of-use systems and ensures that health related contaminants are filtered out by the system. These contaminants may be present in public or private drinking water. 2400-gallon carbon block filter reduces chlorine (taste and odor) and lead, and removes cysts.**

CERTIFICATIONS

The Brita® Hydration Station™ is certified to the CSA B483.1 standard, as well as the NSF/ANSI 61 standard. Therefore, it may be installed whenever an application calls for a drinking fountain.

ADA COMPLIANT+

The Brita® Hydration Station™ is manufactured to comply with the Americans with Disabilities Act when installed per requirements of the Accessibility Guidelines, Section 4.15 for Drinking Fountains & Water Coolers. See drawings for installation instructions.

LEAD FREE PRODUCT

The Brita® Hydration Station™ meets both the AB 1953 and the NSF/ANSI Standard 61 requirements for lead content in drinking water fixtures and plumbing. NSF/ANSI 61 specifically establishes the minimum requirements for chemical contaminants coming from plumbing fixtures that dispense water for human consumption, while AB 1953 mandates that any product that dispenses or conveys drinking water such as pipes, fittings, bubblers, and faucets be lead free in construction.

OPTIONS

- Optional Chiller, model HCR8, provides instantaneous cooling to meet a continuous demand for chilled water
- Chiller mounting frame: Model MTGFR.HSC
- Filter: Brita® Model 6424 is the replacement filter for the Brita® Hydration Station™
- Drain kit for 2000SM: Model 6470 to hard plumb unit to waste line

*Certified to reduce Lead & Cysts. Substances reduced may not be in all user's water. **NSF Certified Filtration. +Model 2000 meets the Americans with Disabilities Act for wheelchair access including front and side approach, along with reach requirements when mounted at the correct height.

BRITA® HYDRATION STATION™

There is a new generation of water consumers that have been asking for a sustainable solution to great-tasting water away-from-home. The result is the next evolution of the drinking fountain. The Brita® Hydration Station™, a CSA and IAPMO certified, touch-free, hygienic, water dispenser, allows users to enjoy the benefits of healthier*, great-tasting, water without the waste and cost of bottled water. So now you can save money, stay hydrated, and live sustainably.

SAVE MONEY

Providing employees and guests with healthier* water is important. The Brita® Hydration Station™ is an alternative to costly, wasteful bottled water. It brings healthier*, filtered water to away-from-home locations. The Brita® Hydration Station™ is a convenient solution that encourages users to refill their reusable containers and helps reduce recurring cost and waste associated with bottled water.

STAY HYDRATED

To feel healthy people need to consume water and stay hydrated every day. Every part of your body, from your skin to your brain, relies on ample hydration. Taking proper hydration into your daily life can have a positive effect on physical and mental performance. The simple task of drinking a glass of water can help increase a person's hand-eye coordination, ability to focus, short-term memory and reasoning skills.

SUPPORT SUSTAINABILITY

Going green and staying hydrated are major themes across North America today. In 2008, in the United States alone, over 39-billion single-serve water bottles were consumed. This increase could be correlated to the lack of convenient, great-tasting hydration options. With the Brita® Hydration Station™, today's hydration and environmentally conscious population can enjoy the convenience of water-on-the-go without having to resort to single-use plastic bottles.

One Brita® Hydration Station™ can reduce the consumption of as many as 36,000 standard 16.9 oz bottles each year.**

*Certified to reduce Lead & Cysts. Substances reduced may not be in all user's water. **Based on 4,800 gallons a year use, figures will vary based on usage. The BRITA trademark and logo are registered trademarks of Brita, LP and are used under license by Haws Corporation®. All rights reserved.

HOW MUCH DO YOU SPEND ON BOTTLED WATER EVERY YEAR?

You provide bottled water to your employees and customers as a perk, but it may be costing you a small fortune. Now you can provide the perk and save money too. Bottled water is expensive, yet with the Brita® Hydration Stations™ you can continue to provide great tasting water and save money.

In this example, a company with 200 employees would save \$11,496 the first year. After that first year the savings actually increase substantially. So, how much are you spending on bottled water? Please visit www.britahydrationstation.com/calculator to see how much you can save by installing a Brita® Hydration Station™ and reducing bottled water from your facility. Your bottom line will thank you.

BRITA® HYDRATION STATION™ COST SAVINGS CALCULATOR

See how much you can save by installing a Brita® Hydration Station™. Simply select the amount of bottled water or 5-gallon jugs your organization consumes and see your savings on the graph.*

OLD PROBLEM ... BETTER SOLUTION.

For years, businesses have been providing an antiquated solution for providing drinking water, one that has cost, environmental and maintenance drawbacks. Say goodbye to the single-use and 5-gallon water bottles, the recurring charges, constant upkeep and excess storage and waste. Say hello to better hydration and cost savings.

The Brita® Hydration Station™ ... great-tasting water away-from-home.

CSA and IAPMO certified to ANSI/NSF Standards 42, 53 & 61, CSA B483.1, is compliant to California Health and Safety Code 116875 (AB 1953-2006). Model 2000 and 2000SM are Certified to the Standards for Safety Electric Plumbing Accessories (ANSI/UL 1951) and Industrial Control Equipment (CSA C22.2 No. 14)
